

Ministry TV Video Specs

If you're selecting one of our video packages, please note that video files will need to be saved in one of the following formats:

- .mp4 — MPEG-4
- .mov, .qt — Apple QuickTime
- .flv, .f4v — Adobe Flash
- .wmv, .asf — Windows Media 9
- .mpg, .vob, .m2v, .mp2 — MPEG-2
- .m4v — Apple iTunes
- .avi — A/V Interleave
- .webm — WebM
- .ogv, .ogg — Ogg
- .mxf — MXF
- .mts — AVCHD
- .mkv — Matroska
- .r3d, .rm — Red Raw Video
- .ram, .rm — RealVideo
- .flac — Native Flac
- .mj2 — Motion JPEG2000

If your video is not in one of these formats you will need to convert it before we can accept the file. Luckily there are a number of free services that will do this for you. We recommend you try one of the following:

- Handbrake (<https://handbrake.fr>)
- Zamzar (<http://www.zamzar.com>)

Podcasting Specs

Channel C is exceptionally simple to work with.
We only need one format for Podcasting:

- .MP3
